

Versatile. Efficient. HotCube³_{TM}

Let the Power of Three Set You Free
Model HC-UA-11 (PATENT PENDING)

Innovation meets ultra-efficiency in the first hybrid heated cabinet. Whether indoors or out, corded or freestanding, this hot cabinet offers flexibility unheard of in the industry.

This adaptable unit switches easily from standard 120 Volt electric to 8700 BTU's of propane fuel and the propane options are as varied as your serving needs. The standard 1 lb. propane tank provides up to 8 hours of hold time. A built-in recessed well effortlessly houses a spare 1 lb. propane canister. Or convert with a hose adapter accessory (optional) to accommodate a 20 lb. tank system. Optional solar panel recharges control when electricity is not available.

The roomy, fully-insulated ¾ size holding cabinet perfectly holds prepared foods at ideal serving temperatures, heating up to 200°F (93°C). Eleven sets of chrome plated wire universal angles accommodate an impressive variety of pan sizes on adjustable 1-1/2" centers. Smooth interior coved corners prevent unsafe food particle and grease buildup.

Resting on heavy duty 8" semi-pneumatic swivel casters (two with brakes), the cabinet provides mobility when fully loaded, even during tough outdoor working conditions.

Indoors or out - let the power of three set you free!

Accessories & Options

- 20 lb. Propane Tank Hose Adapter
- Solar Panel
- Additional Angles
- Left Hand Door Hinging
